INVESTMENT OBJECTIVE AND POLICIES

Investment Objective

The investment objective of the Fund is to provide long-term capital growth. This objective is not guaranteed.

Policy and Guidelines

In order to meet its investment objective, the Fund will diversify investments across various asset classes (as detailed below) providing the opportunity for real capital growth. The Fund will not have any particular geographic or sectoral focus and the Fund may gain exposure to "Emerging Markets" which shall mean any country in which, at the time of purchase of securities, the per capita income is in the low to upper middle ranges, as determined by the World Bank.

The Fund intends to invest principally in transferable securities in the form of cash and/or cash equivalents (including, but not limited to, US Treasury Bills, cash deposits, commercial paper, short-term money market instruments and certificates of deposit), global equities, real estate investment trusts (REITS), global bonds (which may be government and/or corporate, fixed and/or floating, rated and/or unrated), global equity linked securities (which may include, but are not limited to, such instruments as common stock, preference shares and other securities with equity characteristics or conferring the right to acquire equity securities, such as depositary receipts and shares) which are listed on Recognised Markets (as set out in Appendix II of the Prospectus).

The ability to trade REITS in the secondary market may be more limited than other stocks. Investment in REITS will not exceed 25% of the Net Asset Value of the Fund. For the avoidance of doubt, investment in an open-ended REIT will be classified as investment in a collective investment scheme, while investment in a closed-ended REIT (approximately 5% of the Net Asset Value of the Fund) will be classified as investment in a transferable security.

The Fund may typically invest up to 100% of its Net Asset Value in the units and/or shares of Underlying Funds which provide exposure to the asset classes in which the Fund can directly invest as outlined above, subject to the maximum exposure of any one Underlying Fund not exceeding 20% of the Fund's Net Asset Value and subject to the Fund not investing more than 20% of its Net Asset Value in unregulated funds.

"Underlying Fund" means a collective investment scheme (including exchange traded funds) which will be daily dealing, open-ended and may be listed or unlisted and will be domiciled in, in the case of regulated funds in an EU/EEA Member State authorised under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "**UCITS Regulations**") or authorised under domestic legislation implementing the UCITS Regulations and such other investment funds as may be permitted by the Central Bank as Category 1 from time to time (category 1 investment funds pursuant to the AIF rulebook ("**Category 1**")), or authorised in an EU Member State (category 2 investment funds pursuant to the AIF rulebook ("**Category 2**")), Guernsey where authorised as "Class A Schemes" (Category 1) or "Class B Schemes" (Category 2), Jersey where established either as "Recognised Funds" (Category 1) or as funds that are not "Recognised Funds" (Category 2), the Isle of Man as "Authorised Schemes" (Category 1) or "unauthorised schemes" (Category 2), any investment funds authorised by the US Securities and Exchanges Commission under the Investment Companies Act 1940 (Category 2) and such other investment funds as may be permitted by the Central Bank as Category 2 from time to time. The AIFM will confirm to the Central Bank that any new Category 2 investment funds will comply in all material respects with the requirements applicable to a Retail Investor Alternative Investment Fund pursuant to the AIF Rulebook. In the case of unregulated funds these will be domiciled in Australia, Hong Kong and South Africa and will follow an investment strategy that seeks to provide capital appreciation to its investors through direct investment in transferable securities in the form of cash and/or cash equivalents, global equities, real estate investment trusts (REITS), global bonds and global equity linked securities (which may include, but are not limited to, such instruments as common stock preference shares and other securities with equity characteristics or conferring the right to acquire equity securities, such as depositary receipts and shares) which are listed on Recognised Markets (as set out in Appendix

II of the Prospectus). Underlying Funds may not be leveraged. The Underlying Funds must comply with the investment restrictions of the Fund as outlined below.

INVESTMENT STRATEGY

The Fund is actively managed by the Investment Manager. In order for the Fund to achieve its long-term investment objective and investment target, Ci Global Fund Managers ICC Limited (the **"Investment Manager"**) looks at both macro factors such as current and expected future change in asset prices and allocations made by investment managers that operate in the same industry sectors and are of a similar size, along with qualitative criteria such as a review of company management behaviour, accounts and third party reports including back-testing reports received from Investment Advisors. The Investment Advisors when undertaking this back testing looks at both macro factors such as current and expected future change in asset prices and allocations made by peers, along with qualitative criteria such as a review of company management behaviour, accounts and third party reports. By adopting a strategic combination of asset classes listed above, the Investment Manager believes that the Fund's long-term risk-return characteristics are improved as the Fund is not concentrated in any one particular asset class, which builds confidence in the long-term expected investment outcomes. In addition, a quantitative tactical asset allocation process identifies shorter-term opportunities which should assist the Fund in providing long term capital growth for Shareholders. The short-term tactical asset allocation process is based on selected quantitative and qualitative research data on topics such as global economic conditions, asset class valuations, and political and social trends.

LEVERAGE AND GLOBAL EXPOSURE

The Fund will calculate global exposure using the commitment method in accordance with Articles 8, 9, 10 and 11 of Commission Delegated Regulations (EU) No. 231/2013.

The Fund is also required to calculate global exposure utilising the gross method, i.e. "the sum of the absolute value of all positions" with no allowance for netting or hedging arrangements to be applied to the calculations, in accordance with Article 7 of the Commission Delegated Regulation (EU) No. 231/2013. Under the gross method, a maximum leverage limit of 100% shall be employed.

INVESTMENT RESTRICTIONS

The general investment restrictions contained in the "Investment Restrictions" section of the Prospectus shall apply. In addition, the following investment restrictions shall apply to the Fund:

- (a) Short selling of securities is not permitted.
- (b) Under the commitment method the Fund will not be geared or leveraged through investments in any security.
- (c) The Fund will not invest more than 20% of its Net Asset Value in any one Underlying Fund.
- (d) The Fund will not invest in other fund of fund schemes or in other feeder schemes. In this regard the Fund will not invest in Underlying Funds which invest more than 30% of net assets in other investment funds.
- (e) The Fund will not invest in securities that compel the Fund to accept physical delivery of a commodity.
- (f) The Fund may only invest in an Underlying Fund, organised as a collective investment scheme, which ordinarily invest in securities in accordance with the requirements of the South African legislation governing Collective Investment Schemes in Securities.

- (g) Where the Fund invests in shares of an Underlying Fund or any other collective investment scheme managed by the same management company or by an associated or related company, the manager of the scheme in which the investment is being made must waive the preliminary/initial/redemption charge and any AIFM fee which it would normally charge.
- (h) Any commission or other fee received by the AIFM or the Investment Manager in consideration of an investment in an Underlying Fund will be paid into the Fund.
- (i) The Fund does not use securities lending, repurchase/reverse repurchase agreements and total return swaps for efficient portfolio management purposes. If it chooses to do so in the future, it will be subject to the Central Bank's requirements and approval and full details will be provided in an updated Supplement.
- (j) The Fund may obtain exposure up to 20% of its Net Asset Value in sub-investment grade and/or unrated securities, through its investment in Underlying Funds.

INVESTMENT MANAGER

The AIFM has appointed the following Investment Manager to the Fund with effect from 00.01am on 1 April 2023:

The registered office of Portfolio Analytics is c/o Intercontinental Trust Limited, Level 3, Alexander House, 35 Cybercity, Ebene 72201, Mauritius and the registered office of SIP Mauritius International is c/o Intercontinental Fund Services Limited, Level 5, Alexander House, 35 Cybercity, Ebene 72201, Mauritius.

Portfolio Analytics International will specialise in the provision of advisory and discretionary investment management services to collective investment scheme funds.

SIP Mauritius will specialise in the provision of advisory and discretionary investment management services to collective investment scheme funds. It will also provide investment consulting services to investment managers and investment advisors.

DISTRIBUTOR

The AIFM has appointed Ci Collective Investments (RF) (Pty) Limited (the **"Distributor"**) as the Distributor to the Fund. The Distributor is a company incorporated in South Africa which is registered

with the South African Financial Sector Conduct Authority. Its place of business is 54 Peter Place, 1st Floor Blackburn House, Peter Place Park, Bryanston, Johannesburg, South Africa.

The Distributor is approved as a manager in terms of the Collective Investment Schemes Control Act, No 45 of 2002 and administers collective investment scheme portfolios in South Africa. The Distributor is authorised to act as the representative of the Funds of the ICAV, where the Funds wish market their shares in South Africa and are, therefore, required to register with the South African Financial Sector Conduct Authority for approval for public distribution in South Africa.

Borrowings

In accordance with the general provisions contained in the "Borrowing and Lending Powers" section of the Prospectus, the Fund may borrow up to 10% of its net assets on a temporary basis. Such borrowings are permitted only to meet the Fund's obligations in relation to (i) the administration of the Fund relating to purchase or sale transactions; and/or (ii) the redemption or cancellation of Shares in the Fund. Borrowings in relation to (i) above are only permitted for a period of up to 8 calendar days, and 61 calendar days in respect of (ii) in order to comply with the South African legislation governing Collective Investment Schemes in Securities and to allow for the Fund to be distributed to South African retail investors. However, at all times borrowings on behalf of the Fund will be in accordance with the requirements of the Central Bank.

RISK FACTORS

The attention of investors is drawn to the general risk factors set out in the "Risk Factors" section of the Prospectus which, including for the avoidance of doubt "Emerging Market Risks" and "Market Risks and Liquidity", shall apply equally to the Fund. In addition, the following risk factors apply to the Fund:

Charges in respect of investment in Underlying Funds

It should be noted that the Fund incurs the costs of its own management and other service providers as set out under the Charges and Expenses section below. In addition, to the extent the Fund invests in open-ended collective investment schemes, it will bear its proportion of the fees paid by such schemes to their investment manager and other service providers. There may also be performance fees payable at the underlying scheme level. Further details of fees payable by the Underlying Funds are disclosed below under "Fees in respect of investment in Underlying Funds". The semi-annual and annual reports of the ICAV shall provide information on the specific open-ended collective investment schemes which the Fund invests in including their regulatory status and the specific fees paid by the Fund to such schemes. The aggregate of the Underlying Fund's management fees payable in relation to the Underlying Funds will not exceed 2% of the Net Asset Value of the Fund.

Risks associated with investing in Underlying Funds

The Fund may invest in Underlying Funds which may be invested wholly independently of one another and may at times hold economically offsetting positions. To the extent that such Underlying Funds do, in fact, hold such positions, the Fund, considered as a whole, cannot achieve any gain or loss despite incurring expenses.

Furthermore, while the Directors or their delegate will ensure compliance with the investment restrictions applicable to the Fund, the manager of and/or service providers to the Underlying Funds in which the Fund may invest may not be obliged to comply with such investment restrictions in their management / administration of such funds. No assurance can be given that the investment restrictions of the Fund with respect to individual issuers or other exposures will be adhered to by such Underlying Funds or that, when aggregated, exposure by such Underlying Funds to individual issuers or counterparties will not exceed the investment restrictions applicable to the Fund. If the investment restrictions applicable to the investments directly made by the Fund are exceeded

for reasons beyond the control of the Fund or as a result of the exercise of subscription rights, the Directors shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Shareholders of the Fund.

Certain Underlying Funds may have quarterly or less frequent dealing days than the Fund. This could impair the Fund's ability to distribute redemption proceeds to a Shareholder who wishes to redeem its Shares, because of the Fund's inability to realise its investments. In circumstances where the Underlying Funds have less frequent dealing days than the Fund, it may be necessary for the Directors to impose a restriction of up to 10% of the redemption proceeds, as the Fund is unable to realise its investments in the Underlying Funds or where this reflects the redemption policy of the Underlying Funds until such time as the full redemption proceeds from the Underlying Funds are received. This may mean that a Shareholder's redemption request is not met on that Dealing Day and will then be dealt with on a pro-rata basis on the next and subsequent Dealing Days. It may take a considerable length of time from the notification by a Shareholder of a request for redemption to the payment of the remaining redemption proceeds.

Pricing of Underlying Funds

There may be difficulties in obtaining a reliable price for the net asset value of the Underlying Funds as only estimated and indicative valuations of certain Underlying Funds are available at the Valuation Point for the relevant Dealing Day where a redemption is affected. The Underlying Funds may not have dealing days for redemptions which are the same as the Dealing Days in the Fund. This will lead to pricing risk because the net asset value of the Underlying Funds (on the basis of which the Fund's NAV is calculated) may increase or decrease between the Fund's Dealing Day and the Underlying Funds dealing day. Accordingly, the value of an Underlying Funds used for the purpose of valuing the Fund, at the Valuation Point for the relevant Dealing Day, may differ from the amount received by the Fund when it redeems its interests in the Underlying Funds.

Political and/or Regulatory Risks

The value of the Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made. Furthermore, the legal infrastructure and accounting, auditing and reporting standards in certain countries in which investment may be made may not provide the same degree of investor protection or information to investors as would generally apply in major securities markets.

Settlement and Clearing Risk

The trading and settlement practices on some of the exchanges or markets on which the Fund may invest may not be the same as those in more developed markets of Western Europe and the United States. In particular, some or all of the following additional risks may be associated with settlement and clearing of securities transactions in Emerging Market countries. These additional risks include delays experienced in repatriation of sales proceeds due to local exchange controls, an uncertain legal and regulatory environment and the possibility that bargains may be settled by a free delivery of stock with payment of cash in an uncollateralised manner. That may increase settlement and clearing risk and/or result in delays in realising investments made by the Fund.

Custody Risk

Local custody services in some of the Emerging Market countries in which the Fund may invest may not be the same as those in more developed market countries and there is a transaction and custody risk involved in dealing in such markets.

Investment Risk

The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested and accordingly an investment should be viewed as a medium to long

term investment. In addition to market factors, changes in exchange rates may cause the value of shares and, therefore, investments to go up or down.

Persons interested in purchasing shares should inform themselves as to (a) the legal requirements within their own countries for the purchase of shares, (b) any foreign exchange restrictions which may be applicable, and (c) the income and other tax consequences of purchase and repurchase of shares.

Investment in certain securities markets involves a greater degree of risk than usually associated with investment in the securities of other major securities markets. Potential investors should consider all risks before investing in the Fund.

Currency Risk

The net asset value per share will be computed in the base currency of the Fund, whereas the Fund's investments may be acquired in a wide range of currencies, some of which may be affected by currency movements of a more volatile nature than those of developed countries and some of which may not be freely convertible. It may not be possible or practical to hedge against the consequent currency risk exposure and in certain instances the relevant Investment Manager and/or the Investment Advisor may consider it desirable not to hedge against such risk. The relevant Investment Manager may enter into cross currency hedging transactions.

Market Risk

Some of the recognised exchanges on which the Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Fund may liquidate positions to meet repurchase requests or other funding requirements. Potential investors should also note that the securities of small capitalisation companies are less liquid and this may result in fluctuations in the price of the shares of the Fund.

Valuation Risk

The Fund may invest a limited proportion of its assets in unlisted securities. Such investment will be valued at the probable realisation value as determined in accordance with the valuation provisions set out below. Estimates of the fair value of such investments are inherently difficult to establish and are the subject of substantial uncertainty.

Over-the-Counter Markets Risk

Where the Fund acquires securities on over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

Conflicts of Interest

The Investment Managers may appoint an affiliated company as a broker in accordance with the conflicts of interest section in the Prospectus.

Taxation

Potential investors attention is drawn to the taxation risk associated with investing in the Fund. See section headed "Taxation" in the Prospectus.

Legal Risk

Legal Risk is the risk of loss due to unexpected application of a law or regulation, or because contracts are not legally enforceable or documented correctly in the context of financial derivative instruments.

DIVIDEND POLICY

It is the Directors' current intention not to distribute the profits of the Fund derived from its investments. All such profits shall be reinvested in the Fund.
