Collective Investment Schemes in Securities ("CIS") are generally medium to long terms investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to the portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from Ci. Ci does not provide any guarantee either with respect to the capital or the return of the portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for the fund of funds. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. International Investments may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Any portfolio may be closed from time to time in order to manage them more efficiently in accordance with their mandate. The funds are portfolios established and administered by Ci, and APS has been appointed to manage and market the portfolios. APS is an indirect shareholder of Ci. As a shareholder, APS may earn dividends from time to time and participation in any dividends may be linked to the revenue generated by Ci from the APS portfolios, and from any other Ci portfolios. Ci retains full legal responsibility for the co-named portfolios. Additional information on the portfolios may be obtained, free of charge, directly from Ci. Ci is a Non-Voting (Ordinary) Member of the Association for Savings & Investment SA (ASISA).
