

Objectives and Investment Policy summary

Fisher Dugmore Ci Worldwide Flexible Fund

Objective:

The objective of this multi asset portfolio is to provide investors with long-term capital growth.

Investment Policy:

The portfolio maintains a high-risk profile and will have maximum flexibility to vary assets between various markets, asset classes and countries to reflect the changing economic and market conditions. Investments to be included in the Fund will, apart from assets in liquid form, consist solely of participatory interest in portfolios of collective investment schemes registered in the Republic of South Africa or of participatory interest in collective investment schemes or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and the trustee of a sufficient standard to provide investor protection which is at least equivalent to that in South Africa. The Fund will invest in a wide spectrum of markets, including equity, bond, money and property markets and may have exposure to listed and unlisted financial instruments, subject to prevailing regulations. The asset allocation in the Fund will be actively managed and the assets will be shifted between the markets and asset classes to reflect changing economic and market conditions. The manager shall have the maximum flexibility to vary assets between the various markets, asset classes and countries to reflect the changing economic and market conditions. The manager will be permitted to invest in offshore investments as legislation permits.

Disclaimer:

This document is not intended to address the personal circumstances of any Financial Services Provider's (FSP's) client nor is it a risk analysis or examination of any client's financial needs. Collective Investment Schemes in Securities ("CIS") are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from Ci. Ci does not provide any guarantee either with respect to the capital or the return of the portfolios. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. International Investments may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Any portfolio may be closed from time to time in order to manage them more efficiently in accordance with their mandate. The funds are portfolios established and administered by Ci, and Fisher Dugmore Securities (Pty) Ltd has been appointed to manage and market the portfolios. Fisher Dugmore is an indirect shareholder of Ci. As an indirect shareholder, Fisher Dugmore may earn dividends from time to time and participation in any dividends may be linked to the revenue generated by Ci from the Fisher Dugmore portfolios, and from any other Ci portfolios. Ci retains full legal responsibility for these co-named portfolios. Additional information on the portfolios may be obtained, free of charge, directly from Ci. Ci is a non-voting (ordinary) member of the Association for Savings & Investment SA (ASISA). A FX fee of up to 0.05% (incl. VAT) on any FX transactions may be payable to Fisher Dugmore in addition to the annual fees. An execution fee of up to 0.04% (incl. VAT) on any swap transactions may be payable to Fisher Dugmore in addition to the annual fees referred to above.

Total Expense Ratio (TER): For the period from 1 January 2021 to 31 December 2023, the TER % has been annualised and indicates the percentage of the value of the portfolio which was incurred as expenses relating to the administration of the portfolio over the rolling 3 year period or since fund inception, on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER's cannot be regarded as an indication of future TER's.

Transaction Cost (TC): For the period from 1 January 2021 to 31 December 2023, the TC % has been annualised and indicates the percentage of the value of the portfolio which was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction Costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of portfolio, investment decisions of the investment manager and the TER.

Total Investment Charge (TIC) is the TER plus TC which indicates the percentage of the value of the portfolio which was incurred as costs relating to the investment of the portfolio.
